TAMIR SPIERER

Full Stack Web Developer

Dedicated individual who strives to take part in big projects. Capable of adapting to intense environments and learning at a fast pace.

EXPERIENCE

VeracityAds – Full Stack Web Developer
2022 – present

Worked with TypeScript, React, MUI, NestJS, Prisma, GraphQL, SQL, and Git. Created a full stack dashboard system which manages complex data, while also helping maintain other projects and websites.

AmplioSpeech – Digital Content Creator
2020 – 2021

Created online activities and lessons for people with dyslexia on a R&D platform.

Ben Gurion Airport – Security and Informant
2019 – 2020

Inspected and verified flight necessities, managed queues, and helped with the security process.

Israeli Air Force – Laboratory Chemist
2017 – 2019

Worked in a laboratory with chemical solutions and formulas for metal coating and anodizing plane parts.

PROJECTS

3D Portfolio Website
`HTML, CSS, JavaScript, ThreeJS`

Visit my portfolio to see all of my projects!

View Code | View Project

Full Stack Flights App
`React, MUI, ChartJS, MySQL, NodeJS`

Includes login/register sessions with public profiles for each user, and admin role that can edit, create, or delete flights. Uses framer-motion, MUI, and Chart.js libraries, and deployed on Heroku + Netlify.

Cryptopia
`HTML, CSS, JavaScript, jQuery, ChartJS`

jQuery-based SPA website displaying crypto data, includes a pagination algorithm, parallax effect, search with speech-to-text, smooth page transitions, and live graph chart to compare coins.

View Code | View Project

Youtube Clone
`HTML, CSS, SASS`

My first landing page is a responsive, pixel-perfect recreation of YouTube with SCSS. This project solidified my skills with HTML and CSS before moving on to learn javascript.
